

## Press release

### **SEFE and Angola LNG sign delivery contract for the supply of half a million tonnes of liquefied natural gas in 2026**

- **0.5 million tonnes of LNG to be delivered from Angola LNG to SEFE in 2026**
- **Flexible delivery destinations at SEFE's discretion**
- **SEFE CCO Frederic Barnaud: "This mid-term 2026 delivery contract with Angola LNG perfectly complements our existing term and spot supply mix."**

[Berlin, 06 December 2024] SEFE Securing Energy for Europe and Angola LNG expand their partnership for the supply of half a million tonnes of liquefied natural gas (LNG), equivalent to eight LNG cargoes scheduled for 2026. The LNG sourced from Angola can be delivered to a wide range of destinations at SEFE's discretion.

Angola LNG, a joint venture between renowned energy companies Chevron, Azule Energy, a joint venture of BP and ENI, Sonangol, and TotalEnergies, has been producing LNG since 2013. Over the past years, SEFE has frequently procured LNG from Angola LNG on the spot market, appreciating the reliability of its deliveries.

Frederic Barnaud, CCO at SEFE, comments: "We are pleased to further strengthen the security of supply and expand our partnership with Angola LNG, a trusted and established supplier. A diversified and flexible portfolio is crucial for ensuring smooth deliveries of LNG in Germany and Europe. This mid-term 2026 delivery contract with Angola LNG perfectly complements our existing term and spot supply mix."

#### **About SEFE**

SEFE, an international energy company, ensures the security of supply and drives the decarbonisation of its customers. SEFE's activities span the energy value chain, from origination and trading to sales, transport and storage. Through its decades-long expertise in trading and the development of its LNG business, SEFE has become one of the most important suppliers to industrial customers in Europe, with an annual sales volume of 200 TWh of gas and power. Its 50,000 customers range from small businesses to municipalities and multinational organisations. By investing in clean energies and especially in the hydrogen ecosystem, SEFE is contributing to the energy transition. The company employs around 2,000 people globally and is owned by the Federal Government of Germany.

Securing energy – now and for the future.
